Recommendation

MOSTOSTAL PŁOCK S.A. hereby confirms that JobTech Sp. z o.o. provided services as a subcontractor during the expansion of the land-based part of the LNG Terminal in Świnoujście.

JobTech Sp. z o.o. carried out the assigned tasks mainly in the area of cryogenic LNG pipeline work:

- Video inspection of pipelines – both before and after cleaning.
- Pipeline cleaning – mainly through flushing of small-diameter pipelines. For larger diameters, using the air shock blowing method, as well as piston cleaning (“pigging”) and chemical and mechanical cleaning.
- Pressure testing – both hydraulic (up to 189 bar) and pneumatic systems with complex layouts and large volumes. Preparation of documentation and installations for tests.
- Pipeline drying – to -40°C dew point, including complex systems with a maximum diameter of DN1050, along with the necessary fittings as valves etc.
- Leak testing – using air or nitrogen (optional) as the medium.

Throughout the works, JobTech was characterized by full professionalism, emphasizing the necessary experience, knowledge, and equipment needed to carry out the assigned tasks.

All work was completed within the agreed timeframe, preceded by a careful approach to preparation, adherence to procedures, and compliance with the health and safety rules in place at the site.

We are pleased to recommend JobTech Sp. z o.o. as a reliable subcontractor and a trusted business partner.
